Submission	# Support	General	Vision / structure plan. This relates to the ownall intended outcomes in the Toondah harhour PDA for example it acting as a tourism gateway to Moreton Bay and North Stradbroke Island, providing job opportunities and supporting the development of a marina with mised use development including restaurants and	Urban design principles.  This relates to the criteria in the document which guides the design of buildings and public spaces including for example length from licitation and recognition of cultural heritage.	Sustainability and natural environment	Street and movement network. This includes comments relating to roads, parking, pedestrian and cycle networks and paths and public transport.	Amenity and open space. This includes comments relating to improved facilities and services, parks, pedestrian wallways, waterfront connectivity, public access, piers and access to the bay.	Precinct 1 - Mixed use village	Precinct 2 - Residential	Precinct 3 - Vehicle ferries	Precinct 4 - Marina and water based development	Infrastructure plan	Implementation strategy	DA matters
TH14/01	Submitter supports the vision for the PDA and believes it is about time.  Submitter supports improvements to the movement network and improvements to public transport provision.  Submitter supports improvements to public open space and walkways including the public beach.				The males environment is important and important to bould not as well Designing models to be done in a settlinker way in consultation with environmental bodies.	Need to ensure assy access to the POA by public transport.	Would the to see a waterpart facility provided in the park area. for translation owner for a BIO and children ability pays in the water - there are not many facilities the this in close proximity.	Submitter would like to see speciality shops provided in this area.		Submitter requests more convenient ferry services to the other islands (other than Moreton and Stradbroke). Ferry services to some islands have been inconsistent and unrealiable in the past. Submitter notes that the service provider is an important consideration and the harbour is only as good as its services.				
TH14/02	Submitter supports the provision of a marrier supports the provision of a marrier submit see the see are submitted to the see and submitted to the see and submitted to the see and this will provide a marrier hereafted some, but though a submitted to the see and submitted		Submitter ruggests that development should entitled to themse the the PCA and that the PCA's themse should be the PCA and the the PCA's themse should be the PCA and the PCA's themse should be the PCA's and the PCA's themse should be themse the PCA's themse should be the PCA's themse should be the PCA's themse should be themse should be themse themse should be themse themse should be themse themse should be themse themse themse should be themse sho	Submitter suggests that a central "liquium" thould be created incorporating obsopping and other services which is pedestrian friendly with limited which proposed in the control of the co	and for irrigation. Similarities will be aimportant to keep the searn of training large off training large off training large off training large.	Submitter suggests if it is financially viable that a maximum of 5 stores be permitted.	Submitter notes whiche ferries are apart of the PoA. but are not the main reason for development and, that while they should operate in the background made to the background made to the background made on the background for the overall products of the background for the development.			Submitter notes that commercial and residential engineering should demonstrate works best practice standards, with developers demonstrating financial and management skills capable of meeting all aspects of design, construction, sustainability, practically and aesthetics for such a project.	
TH14/03	Submitter supports development of the PBA and notes it is a wonderful idea, more tourism, lote, businesses and people should be brought to Rediands to put it on the map and this will bring more investment and opportunities. Submitter notes otherwise Rediands will be behind the times and left behind.			Submitter notes infrastructure should not be an eye sore and should be made to be as natural booking as possible.		Submitter notes there should be sufficient parking for residents and tourist, but not so much that it looks like a concrete jurge.	Submitter notes that parks and amending an individually a requirement, and plump of shading shall be provided for tryallice and children.							
TH14/04		Solution believes that the scheme is unnecessarily dones and full of planner jurges. More sample jurges from the full regish terminology is required for general pack to obtain.  Solutions: Solutions	opinion. The submitter believes that the harbour should reflect the natural, casual island character of North Stradbroke Island and not be a low rent	The submitter states that building heights have no precedent in Clevifierd and are instinct in both initiage and character and to welfalls. The submitter is concerned about the last borried running the lags of the development concerned that the submitter is the submitter of the development concerned that the mineral high-rise planning ulsion declarys sense of place. The submitter buildiness that the totalen inference to cultural heritage are shadily and filts.	environment. It is about profitable exploitation of a waterfront	Spiriting waters, that shade access poses posteriors from all your shade access posteriors from all your shade access posteriors from a shade access posteriors with shade access posteriors. Solighter notes gold images of shalp hay is displayed on the flow clope yeal should not be used as a model for fluture Department Solimeter rotes that the amenity of Greatend an ingline department of entering the solid proposed of the contract of of the c	Submitter belowes that the proposed outcomes for precient I is not clear enough and cannot enough and cannot enough and cannot enough outcomes for the owner of the owner	Submitter is concerned that development along Middle Street will be replicated within the PDA.	Submitter notes that the carpant for the Red Car is in Carpant for the Red Car is in Trilliant and well planned. Submitter suggests that once car parking is required and properly landscaped and shaded. The submitted believes that this should be replicated at Danwist. Submitter believes that this development, especially which ferries and water taxis, needs to take into submitter believes that which shaded is submitter believes the mailtaint and submitter believes the submitter submit	The submitter is concerned that Raby Bay Malrins is being used as a model for the PCA. The submitter is concerned that The submitter is concerned that Concerned that the submitter is concerned that concerned the submitter is concerned to the concerned that the submitter is concerned to the submitter in the submitter in the submitter is concerned to the public.			
TH14/05		Submitter believes this is an opportunity to do a small scale development which will benefit the community and be a welcoming point for Stradbroke Island visitors.		Submitter is concerned 7.15 storey development will block access, views, sunlight and breezes to other development and the community and does not support buildings of these heights. Submitter notes without detailed playing buildings it is not possible to comment further.	Submitter believes it is unikely locals; will utilise uny corridor in proximity to 7-15 store i buildings and across busy roads. Submitter is concerned acid suffate soils dredged from our channel self affect the marine habitats and any area sphere fill is deposited.	Submitter note: that present ferry timetables do no color dange with the train and bus timetables which disclosulages the use of public transport and that this requires attention.  Submitter concerned that the development of a mixed use village will worsen traffic congestion.	Concerned areas of GI Walter Park will be lost to new roads and parking areas and does not support this.	Submitter notes that Cleveland already has a mixed use centre and does not believe it needs another one within 1km.	r					
TH14/06		Submitter has chosen to live in the area as it is quiet and close to the beach and is generally against any major changes to the area or increased development. In particular the submitter is concerned increased people and development in the area will affect their buciness as well as impact on amenity and habitate / occlose and believes habitates should be protected and and roll lost to development.			Concerned increased development will allest polition, litter, traffic, dripm and reige. In particular more boats would have a negative impire to manips habitate and animals and increased people will result in inclinated nublich in parts; and waterways.		Concerned increased development will result in loss of parkland							
TH14/07		Submitter comments that there have been many schemes por toward genebody and the scheme founded take into accord comments made on those columns of the scheme schemes schemes to the schemes schemes that the area needs rehabilitation but it needs to be done in a sensitive nature.	Selement comments that manageous sorrounding the Tonostich Harbour area should be protected as it is under threat in the Moreton Bay region	Scangel or comment (ME) by denote, must be sized a polygorian's Art spirit action (feel impress) from press (press), employed (press), em		Submitter believes more cycle paths, pedestrine access and local distrib boses to Cereland CBD, required. Submitter believes that more recreational opportunities and less private moorings (marina berhts) are required.	Submitter comments that current access to Toolodah Herbour (not Middle Street) must be restricted by pallet transport, task, othertia busc, cycles, pedestrians and passengers to North Street/orde Island.	Submitter comments that low rise, medium density, materials and firnishes should be sensitive to the marine environment and take account of potential sea level rise.  Submitter believes that development consisting of brick or block on slab and underground parking should be allowed.	Submitter comments that low rise, medium density development should cater for the 45% retirement population as well as singles and couples. Submitter notes that farmly living would be inappropriate.	Submitter believes that more variety of transport options with different operations should be available to the public.	Submitter comments that the marina is much too large and is causing destruction to the managrows and has a negative inspact on the owner of the marina should be restricted to present of the marina should be restricted to presenger wreset to North Straßbrake Island and recreational hire boats.			
TH14/08		Submitter is concerned that the introduction of large rectineants and polar into development in the development in contract and any polar interesses he number of patrons using the area which, could land to an increase in action of faulte lovel and the patrons will be a seen and the fault in the patron of the patrons of	Submitter is concerned that there is no market or noted for further redevelopment of the Toordah Nathour area, caseing it to turn into a ghost town and disjointed communities. Submitter is concerned that developing the area will full the CBD, similar to Raby Bay.	Salmitter questions whether further residential buildings are required where other developments in the area have not been finished due to the isability to sell off.	Submitter is concerned that driedging and dumping soil on the land an artificial beach will extend by the waterways and marries widlife. Sobmitter is concerned that the marries widlife will not be protected.	Submittee comments that currently the areas of Passage Stores and long Stream are usuable to cope with current demand and scorcurred that tether development with which levels trained to this reads. Submittee suggests that the State could connect Passage Storest to a truck connector stream immediately for releve trained congestion. Submittee is concerned that Passage Street has no paths except for a section outside the Privariay school which does not nometic association strained.	Submitter comments that new open spaces is not required as they are already available and believes that the plan decimates the land; appear to the planging of the planting of the plantin				Submitter questions whether a marina is required at Toordah Harbour when marinas in Wynnum and Manly have vacant berths.			
TH14/09							Submitter suggests that a facility like the Redcliffe's Settlement Cove Lapon be created in the GJ Walter Park. Redland City currently does not have anything similar. Submitter believes that the attraction of a swimming lapon would be an enormoul draw card for the Toondah Harbour development.	5						

TH14/10	Submitter comments that it is great to see interest in development the unsued potential of the site and hopes that the proposed objective can be achieved in the face of an expected noisy outspoken minority	submitter believes that the development util open up or opportunities for coffee shough/utiles in the development.  Submitter is in support of the proposed development common and before the Collection of in view proposed of evelopment common and before the Collection of in view profess and conference of conference of the conference of the conference of the Collection of in view profess and conference areas at Roby Bay.		Submitter believes that in his reportence, development such as this with reck walls and deep water of much improved quality result in a major increase in marker life.		Constitute comments that the existing beat ramp is unusuable to all that very small injuriesceplist trader bases; just high toke unjul, does the property of the property of

Solumeter is conversed that major data being dut to draw developers set but 15 for tign integra and controlled professionals listed of food labour. Solumeter is concerned that the self-result in poor design various and controlled developers may not understand the requirements. Solumeter is concerned that a 53 story highly listed list project the horizon area concerned that a 53 story highly listed and protect the horizon area concerned that 5000m2 of retail will severely impact the CSID.	Submitter is concerned that the development is not "Cos Development and a "crain on neutral development" to put feed under a concerned the other map.  Submitter is concerned that per expellities such as 10 hathers Starp or development to early the concerned that per chapitate such as 10 hathers Starp or development to early the concerned to the feed of formal benchmarking.	Submitter is concerned that the parking issue around tips' area will increase with the triffic network configuration and increase and included behavior that one dependent and included and		Submitter is concerned that while few restaurants and open space would be all the will be a many customers from food outlets in the CBO.		Submitter is concerned that more details and plans are not available. Submitter is concerned that issues such a car parking, quantity may not be addressed and with incoreased traffic will heighten the issue.	Submitter believes a marina, divillar in scale to Manly, would have its benefits.		
TH14/29		Submitter comments that development of a toll road out to sea by a private investor will have a number of advantages such as saving on dredging costs, minimal outgoings and without the need to destroy the natural environment and associated ecosystem.	Submitter is concerned that the proposed development scheme will take away the natural environmental features of the area.		Submitter is concerned that the proposed development screene is against the recognition of environmental value by protected mangroves, locals habitats, nigratory shorebird habitat and seagrassed essential to marine life.								
TH14/30			Submitter is concerned that mass built environment will be developed over the natural shoreline and comments that a low key broken built environment enhancing the natural shorelin scraped together with restaurants and greenspace will enhance the asserbeic qualities of the habour and encourage community use.	Submitter is concerned of the current proposed building height and notes that reconition and acknowledgement of the original habitants and mainting generaptics is important.	Submitter is concellined that the proposed developf and scheme may interfere with the submiss bed, and static development the existing channels to protect the marine all represents and node supplies of depoles.  Submitter is concerned of the lifered singlet to the buy led by the divelopment of the marine and is associated infrastructure.	Equinities is supportive of the bileways and removing the entiring surining facilities adjacent to the foreshore in prefilines of a parking station that will reduce the too-print and potentially opine up gene space. Submitter suggests extending the railway line to Toondah Harbour and develop the parking station over there.	submitter is supportive of green open space with family and environmentally friendly activities with low impacting facilities.						
TH14/31		Submitter is concerned that the development will destroy the sulges type atmosphere and the peace and east of the atmosphere and the peace and east of the atmosphere and the peace and east of the atmosphere will tunner to eastern out that the development will tunner the waterform to candidors such as Californ and Townselle which is not what the residents week.	Submitter is concerned that the proposed development scheme does not provide any direct benefit to listed residents in travel time.	distinctive is conserved that the arginous height spirits a straight on a second to the conserved that the arginous height spirits as submitted by a reformer-level that believes higher than the convert height land of 7 darks will look out of global. Social test as signated that the extended margines will registerly exact the small yet or getter. Scientists a concerned that the marine yet will give begintered among a signature of scientists and scientists. Social the concerned that the marine part will give begintered among a signature of Scientists are some of the design that the protection of designated and scientists are some of scientists and scientists. The site from the everyging could also affect the control of scientists and scientists.	Submitter comment that the parking issues associated with Toordah Harikuro could be rescubled by building a multi-story car park on the land set asside for parking in Chevland and allowing the bourists to catch public transport.  Submitter suggested that a paid permit system could be made available as the water task for instant existence. Submitter is concerned that the development will increase traffic movement in the area and increase traffic congestion.	Submitter is concerned that the development will district the printine area and sandy beaches.	Submitter is concerned that this is a massive over development which could be impacted by global warming and cyclonic store surges.	Submitter is concerned that the development will lead to destruction to prime marine habitat, global warming and subsoil sinking which in turn will affect Raby Bay.	small dredging operation an	Submitter is concerned that the marina at Toondah Harbour will be subject to both strong northerly and southerly winds.		
TH14/32		submitter notes that development of the Toondah Harbour area should retain and enhance the natural beauty of the opiace and protect the Bay waters and widdle.	Submitter notes that certain aspects of Toordah istrahour such as the dog park, recreation area and managrose are all important features and should be prioritised in the development. Submitter is concerned that development should be done transfully and mindful of retaining the execution learner of the area being a recreational area rather than commercial.	submitter is consolined about the proposed height limit of 55 storays.		Submitter is supportive of developing a car park to service the increase in traffic. Submitter supports the need to the increase in traffic. Submitter supports the need for includer residents to have a car park super-available for parking of a town car to be used on the maintand.  Submitter committee that provisions for secure parking that require supports though be considered and that all feature car parking development should be maintained.	Salaritter comments that provisions of wallways, blogds trace, and benchmarks through the marginar edge would enhance the placeful and relaxed nature of the area.	Submitter is supportive of introducing casual dining options, better toilet facilities and all-weather departure/arrival areas would enhance visitor's experience.			Submitter is concerned that construction of a large marins would increase foot traffic and noise level taking away the relaxed atmosphere. Submitter is concerned of the increased pollution in the water from fuel, waste and letter. Submitter notes there is a marina at Manky catering for the people of the Moreton Bay area.		
TH14/33	Submitter is supportive of upgrading the facilities in Toondah Harbour and was looking forward to the development of commuter barge and ferry terminals.			Submitter is concerned about the 15 storey height limit.			Submitter is concerned that GJ Walter park will be negatively impacted on in the development.				Submitter is concerned that the marina and Cassium Island will be affected by the development scheme.		
TH14/34		Submitter is concerned that there is an over- development in the upgrading of facilities.  Submitter is concerned about the future safety of the same with the populon increase in criminal activity at right.  Submitter is concerned that the development does not tall let the account that the curver schools are at capacity and cannot let future students with the increase in residental population.	Submitter is concerned that the PDA covers too much land	Submitter is concerned about the 15 storey height limit. Submitter believes that buildings with a height time of 4 storeys should be capped. Submitter is concerned that the increase in high density accommodation will block views from that should be left interrupted for the community.	Submitter is concerned about the increase in pollution to the waterforce doing conclusions place. Submitter is concerned that the water rading will continue to rise.	Calculates to concerned that convently there is only one as the capable of a returning depiction in National season and capable of a reaching the amount of staffic the development unit create.  Submitter concerned that there is not enough parking infrastructure to longoot increase or staffic, understood concerned should be capable or staffic. Submitter connected and there is not enough parking infrastructure from Choeland would have to be appared to the staffic connected and the staffic connected and the staffic capable of the staffic parking in the staffic capable of							

TH14/35	Submitter is supportive of upgrading the facilities in Toondah Harbour.			Submitter is concerned about the 15 storey height timit along the shoreline and believes that parklands, recreational mass, parking facilities and shopping present with until unit complexes should be proposed instead. Submitter is concerned that the area will be developed into another Gold Crost or Sundhine Cost shadow casting area.	Submitter suggests that a marine Education/Research facility and whale mozeme the incorporated and dedicated to the local wildfile and marine life.						
TH14/36	Submitter is supportive of supprading the form premial and the old CMD building with car perlong facilities.	Substitute is conserved that the proposed development will destroy the Shautzer of the area, which was the reason from model that search. TH14/87			Submitter opposes the development of a marina.	Submitter is concerned about the high density development	Submitter is concerned about the pollution and waste caused from the development of the marina and the loss of mangroves to the area.	Submitter is supportive of the bileway but is concerned that the Council is not able to complete the existing shoreline bileway.  Submitter is concerned that the Council refuses to purchase the foreshore strip in Edinburgh street to complete the path to Wilson Street and will end up with the Developer.	Submitter is concerned about the loss of parklands for the development.	Submitter is supportive of the mixed use village with low density development of cafes and shops.	Submitter is supportive of the precinct.	Submitter opposes the development of the marina.		
TH14/88	Submitter is supportive of the upgrade to Toondah Harbour.	Submitter comments that the development of the mainland should be complemented on the island to keep the concept consistent.	Submitter is supportive of the concept of enhancing the 'gateway' to Moreton bay.	Submitter is concerned about the 15 storey height limite and believes that it should be limited to 7 storeys to ensure that the character of the area is not loss.  Submitter comments that the modernisation of the are should be consistent with the current development.	Submitter is concerned about the requirements for dredging and disposal of spoils surrounding mangroves.  Submitter comments that the are is fragile and it is necessary to retain the ecology.	Submitter comments that this is the perfect opportunity to address the parking issue at Dunwich.						
TH14/89	Submitter is suportive of development of the ferry terminal and its associated facilities.	Submitter is supportise of limited reclamation aroun the harbour to support feer yo perations, marine services and a rail mixed use area.  Submitter comments that a new plan should be mad and put to a vote to Rediant residents.  Submitter requests for the development scheme to be withdrawn and a more carefully considered plan developed, including amending the boundaries of the PAA after consideration of public submissions.	Submitter is concerned that the existing infrastructure will be significantly impacted by the responsed development.	Submitter supports development of Toondah harbour environment to include modest, mised our start village and medium density housing consistent with the surrounding area. Submitter is concerned about the 15 story height limit and the proposed hug- population.  Submitter is concerned about the 15 story height limit and the proposed hug- population.  Submitter is concerned that the development will obstruct the natural view of Moreton Bay and surrounding latends.	Submitter is concerned about the deedging of the Habitat Protection Zone to accommodate for an 800 beam marina. Submitter is concerned and the development will last to the distriction of williffer habitat including the present locals corridors, mangrovers and sengrasses. Submitter is concerned that are Environment Impact Study, sedimentations studies or assessment of the impact on the marrier base not been conducted.	Submitter is concerned that the proposed development will reduce access to Moreton Bay and increase traffic congestions on the current road network.	Schentzer is capperhie of upgrading and unidenting of from Causard to the south of Causard trained to a state marker utility from the ferry terminal and public booking facilities. Submitter is not supportive of the government and council setting G I Walter Walter Park and over 48 acres of Moreton Bay			Submitter is concerned that there will be an increased financial burden on RedLand catepayers due to long term dredgling maintence of additional waterways in the area if a marrina is built.  Submitter is concerned about the increase in noise and ecological pollution		
TH14/90	Submitter is supportive of the enhancement of the foreshore and increase efficiency for access to Stradbroke Island.  Submitter is supportive of some commercial development.	Submitter is concerned that the proposal is to ambitious and flowed.  Submitter is concerned about the expenditure by Council on the propopoal where there is little prospect of success.		Submitter is concerned that high rise development will detract from the value of the location.	Submitter is concerned about the impact the development will have on the environment. Submitter comments that there is acid soil contamination present and should be tested prior to distribute of th gol.  Submitter is concerned that the management of dredge spoil is not clearly quillined in the development scheme.	Submitter is concerned about whether the parking areas will be maintained for North Stradbroke Island residents and visitors.				Submitter is concerned that development of the marina will not be viable as there are marinas in other locations not operating at full capacity.		
TH14/91	Submitter is supportive of only redevelopment of the ferry terminals, including improved parking facilities, mixed use area and a low density housing.	Submitter is concerned that the target residential population is over 3500 and believes it is too much for the area.  Submitter is concerned that public consultation for the plans have been very minimal.	Submitter is concerned that the name of the PDA is misleading. Submitter bollows that the development obtained be relate to Toodah Harbour and the adjacent land over and not extend to the Parliand and Moreton Bay. Submitter is concerned that an over supply of commercial development will impact the existing Cleveland CBO and RAby Bay harbourside business.	Submitter is concerned that the proposal is an overdiverligement which is inconsistent with the surrounding areas of Cleveland.  Submitter comments that the building heights devide be governed by the current Related of Converted Beard Beard of Converted Beard		Submitter is concerned about the increase in demand for parking which the current infrastructure cannot not support.  Submitter is concerned that the plans for road upgrades have not been put forward and it concerned that the current road and entured that the current road antwork cannot support the increase in traffic.	Submitter is concurred that the sale of 48 hoctures of Moreline Bay is undemonatio.			Submitter is concerned that development of the marina will not be viable as there are marinas in other locations not operating at full capacity.  Submitter is concerned that development of the marina will increase the financial burden on retepying the orderiging and maintenance of additional waterways.		
TH14/92	Submitter is supportive of improving facilities for travellers to South Stradbroke Island.		Submitter is supportive of small mixed use services and a finited mixed use Urban village including medium density housing.  Submitter is concerned that extensive construction of commercial development will be detrimental to the Cleveland CBD.	Submitter is concerned that a 15 storey height limit is an over development an unsustainable.	Submitter is concerned that the development would be detrimental to the marine and land environment.		Solumiter is concerned that parklaids will be for to development			Submitter is not supportive of an extensive marina.		
TH14/93		Submitter comments that the long term occoronic flarms of the boys is not notice and will be impacted in a supplier by the proposal Solimeter is consequently by the proposal Solimeter in content dependent of their loss of business.	Submitter believes the PGA site is better focated in Orestand.	Submitter is not concerned that the proposed development does not tale into account the hartsgay values for the area.	Submitter is concerned that this habitat and mangroses will be destroyed in the development.  Submitter is concerned that SMASAN has not been considered in development of the marks.  Submitter is concerned that SMASAN has not been considered in development of the marks.  Submitter is concerned that additional boart staff, will point in the water and be determent to the say pass and truth polyplation, hypotherase and thanks.  Submitter is concerned that the difference and thanks.  Submitter is concerned that the difference and thanks.		Silbestrae is concurred that Gi Walter park will be lost in the proposed development			Submitter is not supportive of an extensive marrina.		
TH14/94	Submitter is supportive of the proposal and believes that it is well overdue.	Submitter believes that the proposal should not be withdrawn or watered down due to the minitory's opposition. Submitter believes that the current opposition would also have opposed other development around the area.	Submitter is supportive of marina is believes it will be a fantastic asset to liven up the area.		Submitter believes that the area cannot be described in a local and/o wildlife corridor or in need of preservation.		Submitter is supportive of the proposal and believes that the park is being overtaken by mangroves and the view of bay will be obstructed.  The beach is concerned that the beach is unusable in its current state for any water activities.					
TH14/9S	Submitter is supportive of only redevelopment of the ferry terminals, including improved parking facilities, mixed use area and a low density housing.	Submitter is concerned that the target residential population is over 3500 and believes it is too much for the area. Submitter is concerned that public consultation for the plans have been very minimal.	Submitter is concerned that the name of the PDA in mislanding. Submitter believes that the disvelopment should be relate to Toodah Horbor and the adjacent flow over all not extend to the Parlistical and Moreton Bay. Submitter is concerned that an even supply of commercial development will impact the existing. Overland CBD and RAMy Bay harbourside business.	Submitter is concerned that the proprietal is an eyend-weighten which is inconsistent with the currounding lives of Symbolish.  Submitter comments (Symbolish) is a legislated to the comment of the submitted by the current Reduced (Symbolish pale) is a legislated to the comment of the submitted pale of the submitted that the submitted by the current Reduced (Symbolish pale) is a legislated to the submitted that the submitted tha		Submitter is concerned about the increase in demand for painting which the current infrastructure cannot not support.  Submitter is concerned that the plans for road upgrades have not been just forward and is concerned that the current road entwork cannot support the increase in traffic.	Submitter is concurred that the sake of 48 hectures of Moreton Bay is undemonantic.			Submitter is concerned that development of the marins will not be viable as there are marins in other locations not operating at full capacity. Submitter is concerned that development of the marins will increase the financial burden or religious does not freelying and maintenance of additional waterways.		
TH14/96			Submitter would like to see an attractive, clean, open entry to Toondah Harbour to welcome water craft and allow for safe boarding and disembarisment.									
TH14/97			Sabmitter is supportive only of a more modern Toxoda in Hobour development that may include a count learning, multi-more development, and children's plagmount, to less that contrast generare which could be used for local events plagmount bearing to less that the development children's bearing to the purpose of the country to purpose of the purpose of the purpose of purpose of purpose pu	Submitter believes a smaller development will retain the "country town" atmosphere.  Submitter is concerned about the 15 storey height limit and believes that 5 storey would be more consistent with the area.			Substitute is concerned that GI Walter Park and 48 hectares of the Marter Park will be sold or given to private developers.					
TH14/98			Submitter is concerend of the extensive development and believes that such facilities are already available with sufficient capacity in the local area.	Submitter is concerned that the proposed building height is not consistent with the exciting area.	Submitter is concerned that the existing habitat and widdle will be impacted negatively and undermined by the development	Submitter comments that the natural environment should be the focus and not concrete walkways and cycle paths.	Submitter is concerned that the off Isaach dog park is current well used and the proposed development will impact on the community's access to the park. Submitter is concerned that the park shall be downsized by the development.	Submitter is concered that additional residential development will not be viable and that there is no evidence to support the additioanl development.		Submitter is concerned that the proposed 800 berth marina is excessive.		
TH14/99			Submitter comments that the southern end of the proposed development would be welcomed by most residents.			Submitter is concerned that the planned walkway will make the extensive marina seem like a concrete jungle.	Submitter opposes inclusion of GJ Walter Park being included in the PDA boundary as development will reduce public access to the bay.					

TH14/100		Submitter is concerned that the progoced development will not be well-helically pleasing.	Submitter is concurred that the vision of the proposal is more mitted to commercial activity than the open space and natural environment.	Solicitate is concerned that there will be an overdevelopment of high density buildings.  Solicitate is supportive of commercial buildings near the ferry terminal.  Solicitate is concerned that buildings are proposed over 60 Wahler Park and wheleves that it will be spott.  Solicitate is concerned that the development will affect the beauty of the bay and if taked otherwise.  Solicitate is concerned that the development will affect the beauty of the bay and if taked otherwise.  Solicitate is concerned about the 15 storey height limit.	Submitter is concerned that the prognound infrastructure will during the natural amountment.  Submitter is concerned that the diveleging for the marina will during the satural environment.	Submitter is supportive of a bicycle path/pedestrian path.	The salestian's concerned that G Wolfer park will be loss and methodologies. Solicetize comments that access to the lay can be achieved without development of the marks.	Submitter is concerned that specified use village will spoil the beauty of the bay.	Submitter comments that there should be no residential development.		Submitter is concerned that development of the marrias will spoil the view out to the bay.		
TH14/101	Submitter is supportive of development of modern ferry terminals and associated facilities.		Submitter is supportive of development of the immediate environment to include modest, mixed user utter village and mixelum density frozeng consistent with the correctable gives.	Schmitter is concerned about the construction of high density buildings and the increase in populations and traffile.	Submitter is concerned that reclamation of Moniton will distroy marine life and their habitats.		Substitute is consumed about the development in the area of consider for an other consequential late in a specific open open and deg exercise area.  Substitute comments that the edit CRIXO building should be incorporated into GI Value Park.			>			
TH14/102			Submitter is supportive of upgrading the Marine Rescue area and some low density urban village environment.	Submitter is concerned about the 15 storey height limit and believes that it is not consistent with the current area.		Submitter is concerned that the increase in road traffic from the development cannot be supported by the current road network.	Submitter is concerned about the development in the are of GI water Park and the consequential loss as a public open splice and dog exercises area.						
TH14/103			Submitter is concerned that the proposal will over develop and commercialise the area against the community's wishes.	issimitter is concerned about the 15 storey height limit and believes that it is to high for a site that is so close to Moveton Bay.  Submitter is concerned that the proposal will create a "Sentrary Cove" of yell development that is inconsistent with the atmosphere of the area.	have on the marine park.	Submitter is concerned about increase traffic congestion on the current road network which cannot sustain its current capacity.	Submitter is increased about the development in this area of GI water Pars.				Submitter is concerned that development of a Marina will not be viable as Britshane has an oversupply of marina berths and the current one at Raby Bay is sufficient to meet demand.		
TH14/104			Submitter is concerned about the "local village" theme for the area.  Submitter opposes commercial development in the area as a means to attract visiters to the islands.  Submitter is supportive of improving refreshment facilities for travellers.	Submitter is concerned about the development of high density residential buildings and commercial buildings. Submitter believes that this development of both the air a distance where transport and parting do not cause rangestion.	Submitter is supportive of dredging to improve ferry-water access at all tolds states. Submitter comments that land and soawly reclamation should be kept at a minimal, enough for the safe use of the harbour.	Submitter comments that the provision of footpaths and bus stops stopy to so of netricted natural to preserve the locality of the 'yea.							
TH14/105			Submitter is concerned that the commercial development will affect the Cleveland CBD.  Submitter comments that the upgrade of facilities for the habour should be current and low key.	Submitter is concerned that the development is out of scale and inconsistent with the area.	Submitter is concerned about the dredging requirements for the proposal.								
TH14/106		School fair requests that the proposed development common be emission as and commons a near development common be supply at all and proper community consultation process such only with her as a development common process such only and process and common process and the process and the process and the process and the process and	Submitter is concerned that previous community engagement this not been trained into engagement that not been trained into engagement that not been trained into engagement that the contrained engagement is the contrained engagement in the contraine	Soluborities in Construent their community constitution was not taken (III) and confidence of the constitution of a new access read above the constitution of a new access read above the boundary would diminish ship has as a shortcost into its readers that their spelling large and an always would require and an always and the constitution of a new access read above the boundary would diminish ship has as a shortcost into its readers (and the plants) and an always would require the congruent of the constitution of the cons	Schentise is concerned that the dynamic of development kill departury the management and savely in white the large of the						substitute is occurrented that the numerous a social solidate and the conditions to an ability and are as and would require extended to the ability and are as and constant and constant of endings as an unacceptable cost to the community. Submitter is concerned that this will reduce access to the area.  Submitter is concerned that the religious access to the area.  In concerned that the car garding issue will increase with an increase in demand by population growth	submitter is concurred that the development will make it more difficult to access the boat ramps and enjoy the facilities by the water.  Submitter is concurred that the GI Water Park will be lost to private development and that there will be a lack of open space.					
TH14/251	Submitter is supportive of the proposal to develop Toondah Harbour.	Submitter comments that once Toondah Harbour has been developed, the State should also look to developing the infrastructure at Durwich.	5									
TH14/252		Submitter is concerned that the process is not transparent to the community.	Submitter is concerned that the proposal does not take into consideration the community feedback sought in 2013.	Submitter is concerned about the 15 storey height limit is not within the historical precinct.	Submitter is concerned that the proposal does not take into account the environment impacts.		Submitter is concerned that us Walter Pain and existing open space will be lost to private a release.		:	Submitter is concerned that the Marina will impose an increase financial burden to rate pawers		
TH14/253	Submitter supports the development of modern ferry terminals and associated facilities as well as extra car parking.	Submitter comments that the development scheme be withdrawn and a more carefully considered plan be prepared and amend the boundaries of the PDA.	development will impact negatively on Cleveland	Submitter is concerned that the 15 storey height limit is not required in the area.	Submitter is concerned about the dredging of the Habitat Protection Zone of Moneton Bay.  Submitter is concerned about the destruction of wildlife habitat including the locals corridor, mangroves and seagrasses.	Submitter is concerned that the current road network and parking infrastructure will not support the increase in demand.	Submitter is clincerned that GI Valter Pu'rk and discting open space will do lost to private developers will dust stuure prilitings.					
TH14/254			Submitter comments that retail development should be limited to restaurants and cafes only. Submitter comments that retail expansion should be confined to the CBD.	Submitter is concerned about building height limits and comments that it should be limited to 6 storeys and not encroaching on the foreshore/walkway			Submitter is uncerned that there will be a lack of open space. Submitter comments that it the lage as it was smiler to South Bank then the recreational and open space should be left as it is with large buildings uppt off the light.			Submitter is concerned that the marina will require ongoing dredging and maintenance. Submitter comments that a small area for visiting boats would be adequate.		
TH14/255	Submitter supports upgrading the ferry terminal and progressing development that is in keeping with the area that the community wants and needs.	Submitter comments that there is no information about the development for the public.  Submitter is concerned that the public consultation process is merely a tick the box event rather than engaging with the community.	Submitter is concerned that extensive commercial development will impact negatively on the Cleveland CBD.  Submitter believes that Council should refocus on supporting established areas and improve facilities.	Submitter is concerned about the 15 storey height limit and believes that it is not necessary for the community and would not preserve the ambience of the area. Submitter believes that it will be an overdevelopment of the area.	Submitter is concerned about the impact on the environment four the development.  Submitter is concerned that there is no information of how Coally I will manage and investigate the effects of the development in Morstol, ib will have on mangrover, subabal and marine life.	Submitter is the genned that the current good silf-work will, not support the dispresse in population and usage.			1	Submitter is concerned that council have not taken into consideration the consequence of the weather that will have on boats moored at the harbour. Submitter believes that people will now their boats at the marina if they feel that it is unsafe.		
TH14/256				Submitter is concerned that the height limit will be an overdevelopment and is occusionate with the curved height conditions in the area. Submitter is consorted but the development does not take last our off-development and is off-development does not take last our off-development does not			Submitter is concerned about the bos of GI Walter Park and associated open space due to private development.		1	Submitter is concerned that there a financial burden will be placed on ratepayers with the ongoing maintenance and dredging of additional water ways for the marina. Submitter is concerned about the weather appect and fits consequences on the marina.		
TH14/257	Submitter is supportive of an upgrade to the ferry terminal, passenger waiting area and car pair, driedging to improve access for ferries and making the ferry terminal pleasant with green space and small cafes.	Submitter comments that the area only requires minimal upgrades. Submitter is concerned that Council will turn the area into a mini Gold coast. Submitter is concerned that a private developer will redevelop the whole sight of a transformer. Submitter comments that the scheme should be withflown and re-submitterd under the correct pay puttern.	Submitter comments that Toondah Harbour is the gateway to the islands and the development will distroy the natural landscape of the area.  Submitter is concerned that extensive commercial development will impact the Cleveland CBD.	Scientier is cognified about to the Science height limit and believe big an overdening offer that is reconstantly with the local area scillature conhown making if more according to the AT advers.	Submitter it galaxiesed about the removal of manageness along the frost of GLV Walter Park and believes it is an important part of the natural exercisement.				:	Submitter opposes the development of an 800 berth marins that will have a significant environmental impact on the area.		
TH14/258	Submitter is supportive of the ferry terminal and immediate surrounds to be developed.	Submitter does not support the proposed			Submitter is concerned that the natural habitat for marine life will be destroyed.		Submitter is concerned that GI Walter Park will be lost to private winderspensor.  Submitter is concerned that the proposed new open space will not be adequate to service an increase in population and universities growth.  Submitter comments that a small broadwalk and retail crudies are all the control of the park though not be open for private development.					
TH14/259		development scheme and believes that the undeveloped foreshore will be ruined.			Submitter is concerned that the bay and coastline will not be protected and development will impact the wildlife and marine life.	4

Submitter is concurred that desire commercial development will conjust the fair beyond continued to the continued continued to the continued of submitter is concurred that there are too many fragmented development in the area and that it is the continued of the continued	Submitter concerned about the 15 storey holding height time. Submitter comments that we should enhance and improve what is already available.	Submitter is concerned that the scheme does not take into consideration the presentation of intrust files and widtlife. Submitter is concerned that the wild life will be threatened by the development.		Submitter is concerned that GI Wolfer Park will be lost to private development. Submitter does not support designing or reclamation of any area adjacent to GI Wolfer Park.					
TH14/272				Submitter is concerned about the 15 storey building height limit.  Subminiter comments that we should enhance and improve what is already available.	Submitter is concerned that the droughing of the cay will lead to the destruction of mangroves, see grasses and impact the fishing industry. Submitter is concered that koala habitats will be disturbed.		Submitter is concerned about the loss of GJ Walter Park.					
TH14/273		Submitter comments that more community consultation is required.  Submitter comments that a competition to get design ideas for the ferry terminal, marine services, parking, coffee shops and small business can be incorporated into the process		Submitter appases high density development on or near the foreshore.	Submitter comments that there should be a high regard for the environment.	Submitter is considered that the current road network will not be able to support the increase in road traffic and notes that is should be considered early in the planning stage.	Submitter is concerned about the loss of GI Walter Park and associated open space due to private development and comments that it should not be included in the boundary of the PDA.  Submitter comments no road through the park.			Submitter opposes the development of the marina as it will be a danger to wildlife habitat and marine environment from pollution and reclamation.		
TH14/274		Submitter would consider supporting a smaller scale project.	Submitter is concerned that the extensive commercial development will impact on the Gevelond CBD and Raby Bay.	Submitter is concerned that the 15 storey height limit is an overdevelopment	Submitter is concerned about the impact on wildlife and the beauty of the Bay coast will be affected permanently.		Submitter opposes the selling or giving away of GI Walter fark which was given to Council for the purpose of its current (or. Submitter opposes the selling of Moreton Bay. Submitter opposes the reclamation or bringing of the area adjacent to GI Walter Park.		)	Submitter is concerend that there will be an increased financial burden on Redland ratepayers due to long term dredging maintenance of additional waterways in the area.		
TH14/275	Submitter is supportive of the proposal and believes that it is well overdue.  Submitter supports the council working together with the State to achieve the vision of the development.	Submitter comments that the project should not be scaled down or withdrawn due to an active protest by minority groups.  Submitter comments that objectors have given a false impression of a large scale opposition.	Submitter supports the upgrade and notes that the current state of the terminal is an eyesore.		Submitter comments that there is false representation regarding the wildlife.		Submitter comments that confideration mould be given to further both ramps if there is difficiently access. Sometime to grow the season does grid should not be on the Waterford.  Submitter community that there are currently likes represents this about beach views and access.	>		Submitter comments that there are measurable benefits for the development of a marina.		
TH14/276		Submitter comments that the scheme should be withdrawn and a new one prepared with full community consultation for a smaller scale development.	Submitter is concerned that the scheme does not take into consideration advice from the GHO repor compiled in 3011 noting that a number of technica studies are required to underpin the scheme.	Submitter is concerned that the 15 storey height limit will impact on the environment.	Scientifies a concerned that the development will district placed, manageness, scandinates and medital or the suspicious stations. TH14/467			Submitter is concerned that the area is not suitable for the enormous amount of development and large number of people transiting through the area encroach on a populat recreational area.  Submitter comments that as a gateway to North Stradbroke Island it may work.	Submitter is concerned that the 55 storey height limits is inconsistent with the Redland Planning Scheme and is unnecessarily high.	Submitter is concerned about the impact on the environment from the development.	Submitter comments that the area has been used for recreational purposes and is not suitable for the amount of traffic and pollution that would be generated.	Submitted Comments that the clean space should be left as it is again for over investigated.	Submitter comments that this is uncomments. Cinyeland CBD is only minutes away.	Submitter is concerned that development of the residential precient will impact the environment.	Submitter comments that large vehicle movements would destroy the ambience and relaxed recreational facilities enjoyed by so many	Submitter is concerned that the area is too shallow for marine development and would require frequent dredging. Submitter is concerned as to who will fund the dredging and maintenance.		
TH14/468				Schmitter believes that the building heights should be limited to 6 storys to was the belogistic atmosphere. Submitter comments that this is the limit for fire limited in register. Supplies in English Submitter is concerned that the devotagement will turn into a min Gold Coust. Submitter comments that the hardage size with the area need to be encouraged through statuss and sexts about trees.	Submitter is concerned that the development will impact the marine park and its fisherine.  Submitter is concerned that the development will destroy and the clean environment and increase pollution.	Submitter comments that wide footpaths and septrate opts path should be recorpated into the development, and a septrate opts and a septrate opts of the footpath of the footpa	Submittee comments that public days laken need to be family formed presented, before the reply-language experience, some trees planguage experience, some trees planguage experience experi	Submitter comments that the the vitage should have a variety of shops, cafes, hair salon and a post office. Submitter comments that a garage for petrol and supplies for cars and boats would be good as well.		Submitter comments that forries and private vessels should be limited access to one area color and properties. Submitter recomments that protection from weather elements is important and allow for safe access for people and vehicles.	Submitter suggeds that the marina be instead to 20-40 bents.		
TH14/469		Submitter comments that they did not show how to complete the order submission form properly.	submitter is concerned that extensive commercial development will be detrimental to the Cleveland CBD.	Submitter is concerned about high density development		Submitter inforcement that the cargent paying infang fitting does not men; the cargent find future does not men; the cargent find future drivand and will not spillopped any increase in population. Submitter is concerned their paid paying will not provide solution to the issue side comments that it could lead to a processe in visit primitives to the future. Submitter is concerned that the current road network is congested and will not support any increase in population or size.	Submitter is concerned that GJ Walter Park will be lost to private developer to concerned that GJ Walter Park will be lost to private developers and post to provide the submitted of the submitt	,					
TH14/470		Submitter is concerned that Council will give the development to the highest beloof used will scorifice the communities which to profit.  Submitter is concerned that an oversact development will be the controlled to overboding local development.  Submitter is concerned that community feedback is not being considered.	Submittee is concurred that a multi-downy recort will not attract voicions to the area. Submittee indirect that Toodah habour is only a traces have already as the control had and one described for frourism. Submittee comments that advantagement similar for all the comment of the comment o	recognised in July directly developinger.  Submitted commercial that the development should preserve the natural afformment, mild protect local, investigents and best interests.	Submitter advancement that the removal of manageness for the development will impact on the wild, mainle and plant this in the executionment.	Submitter is concerned about the parking facilities around Obestend and surrounding seas. Submitter is concerned that parking issues is not a priority for Council.	Submitter is concurred that development on GI Walter Fark will limit access to the water.  Submitter is concurred that there is inadequate parklands in the proposal.				submitter is concarned that the dragging required for the mains will fall to cratepayers.		
TH14/471	Submitter supports a revemp of the existing Toondah Harbour.	Submitter commets that the plans are poorly done.  Submitter comments that these developments are outdated.  Submitter comments that this is an opportunity to discomething on a lesser scale and enables what is already on offer.	Submitter comments that the scale of development is too large.	Solanitar comments that buildings should not be above tree height that close to the bay.	Submitter comments that investigations as to what is sustainable in the scale of the development for the fisheries.	Submitter is concerned that there are no principles underpinning the plans.	Submitter comments that the site should not encroach on public open space that already exist. Submitter comments that improvements should be made to the existing parkland.	Submitter does not agree.	Submitter does not agree.	Submitter comments that this is the only precinct that requires redevelopment and include a cafes, shop and interactive complex.	the marina.		
TH14/472		Submittee comments that it is hard to understand the maps.	Submitter agrees with the importance of Condah istrations binding an attractive and effective getoway to Stradbroke stand and Moreton Bay. Submitter agrees that creation of call greenict and more effective marina will create job opportunities.	Solimiter is conserved about the height limit and believes that anything over zerow, will not look good, create vious and traffic problem.  Solimiter comments that building should only occur on reclaimed area in front of in Variate Park.  Solimiter comments that development should embrace the Quandamook outbur all heritage.	preserved.	Submitter is concerned that the current road entour's and parking infortuncture will not support the development and should be addressed.  Submitter comments that there should be a separate bileway to footpaths.	Submitter suggests that the dog park should be moved to island street.  Submitter comments that more walkeways along the waterfront will be good.  Submitter suggest a water park/good in front of Grand View Need would be great facility.	Submitter comments that no high rise at terminal end of harbour should be allowed only Grand View Hotel end .  Submitter asks whether hostel in the preferred land use is meant to be hotel.	Submitter comments that no high rise at terminal end of harbour should be allowed only Grand View Hotel end.	Submitter comments that n high rise at terminal end of harbour, including boat storage should be allowed only Grand View Hotel end. Submitter comments that flood lights to the water.	Submitter comments that no high rise at terminal end of harbour, including boot storage should be allowed only Grand View Hotel end of the storage of the storage Submitter comments that flood lights to the water.		

TH14/473	Submitter supports the improvement to access to the ferry and transit turning and transit turning and the operating areas.	Submittee comments that the scheme is over ambitions and ignores unavoicable francial and control of the scheme is over ambitions and ignore unavoicable francial development options it rought with outgoing scheme in the scheme in the scheme and touding framework is support to make jump to the large parts. Submitter is concerned that the scheme does not address	Selectors is concurred that as 800 borsts marked with case to stake and will be a target date deligation for the state and council. Selectors is concurred that there will be an over exply of marked scalibles in the sea and that there will be and that there will be and that there will be coparting at full capacity. Selectors is concerned that the marked will be expensive to maintain and the costs will fast to contappayers.		
TH14/474	Submitter supports some development of the harbour area.			Submitter is cocnemed about high density development and believes that it will spoil views.  Submitter believes that there are no requirements for residential developments to see that high.	Submitter comments that wildlife protection is important and that the development will disturb the koala's natural habitat and drive them ou of the area.	Submitter comments that there must be provision to solve the issue of car parking.	Submitter comments that open spaces should be retained and notes that GJ Walter Park requires upgrading to its facilities with a pool, water play, bbq and shelter provision.				Submitter is concerned that the proposed habour is too exposed and not sheltered enough for long term use. This will impact on marine species living in the bay.		
TH14/475		Submitter comments that the scheme is very ambitious and will help to make Cleveland look like every other waterfront development along SEQ.	location as it is not imposed as a single planned development but grew gradually over time.	Submitter is concerned that the 15 story height finite does not fit in with the existing distance of the area. Submitter is consented to the present personal results of Aboriginal storeworks and recombination and comments that it is undear what is maked and the scheme about invokasia a discussion on that is undear what is maked and the scheme about invokasia a discussion on the scheme about an existing land.	Submitter comments that development should be designed with environmentally scotchedly in mind and be principal purpose of foregrounding the environment. Submitter is comment that the consortion on the marks will impact the muniform and manageness and this has not been adequately addressed in the schame.	Submitter is concerned that the current road network an pointing infrastructure will not be allow to support the three-lated population and found multilate.		whenter committee that the mount of the more of the mo					
TH14/476		Salentter convents that the development chold be designed, constructed and operated to in environmentally and economically suctainable manner.  Salentter is concerned that the development will be certly to Council and ratepayers.	Sabmitter supports the establishment of tourism and community facilities as part of the development and raining the regions profits. Sabmitter is concerned that there is 300 much supple for own dentity and inappropriate development.	Submitter supports the location of the higher density residential presents being on residented fragers reaming at right angles to the above to maintain where control and between for the resident where control and between for the resident submitter is concerned and 15 storepy is too high. 8-10 storeps is more in languing with the scale of the development.	Submitter comments that good development will result in an improvement for the environment.	Glaborital jornmen's that shallooks will thought through the control of the contr	Operator ligitimens that alone space and GI Walter Park are accelerated assessment of the event should be accelerated assessments that seems should be Superate comments that seems desirable should be proposed as a man. Superate are man. Superate	Submitter comments that the precinct should not include GJ Walter Park. Submitter comments that the height plan is too extensive for the are and should be reduced to 10.	Submitter comments that 4 storeys would better serve the precinct.	Submitter comments that recreational boar ramp and traker parking and on water refuelling facilities is important.	Submitter is supportive of the marina development and notes that there five opportunities lift to provide these facilities. Submitter comments that tourism business must be allowed to operate out of the Marina to provide water fourism activities for localized and visitions with publicity accessful pointions, provided for operators to use. Submitter opposes at allegard or haudout facility in the practice.		
TH14/477		Submitter is concerned that the Council will take public owned spaces and turn it into private development and ratepayers will be bear the cost of developing sits on required by the community. Submitter is concerned that the Council will pay developers to development the site.		Submitter is concerned about building height limits		Submitter of concerned about traffic congestion							
TH14/478			Submitter comments that some development is required but must be consistent with the context of the local reducted inflatarturate that enhance the environment and not overdeveloped with high rise buildings.	Submitter is concerned about the 15 stopply height limit.	Submittally concerned that diredging will impact the natural approximation and affect a vital part of the marine food chain.	Submitter is concerned that the current road network will not support the increase in population and usage. Submitter comments that public transport will not cater for such a dramatic increase in population.	Submitter comments that the waterfront should be legs as is and that improved facilities are fine in moderation.	Submitter comments that major development will change the feel of the area. Submitter suggests that a smaller scale development will enhance the area and not overide it.	Submitter objects to the preciont proposal.	Submitter comments that the current vehicle ferries already run without drama and should not be changed.	Submitter is concerned that a marina is not warranted as there is already a marina at Raby Bay. Submitter suggest a smaller scale marina could be at. Submitter comments that the area should be enhanced by the bay's beauty and not hide it behind buildings.		
TH14/479		Submittee commetes that the development is an opportunity of display-why floations is sure that the comment of	Submitter supports new ferry/bal operators to make the needs of locals and courts. Submitter supports the need for standard sand readings supports the need resultance and open support parklands are necessary in the development.		Submitter is concerned that the development will put more stress on the marking part cause more environmental issues.	Submitter is concerned that the road network does not support the current population and will not be able to do useful an internal population. Such with a tricense appositation. Submitter comments that increased parking infrastructure is required none elicities comments that increased parking infrastructure is required none elicities comments that increased parking infrastructure is required none elicities comments that more paths will need to be created for parketitimes. Submitter suggests that separate cycle bines should be increporated onto the road.  Submitter comments that place transport should be improved and more efficient to alekate traffic.	Submitter comments that goes puris are important and should be properly enriced.  Submitter notes that leavapacess, walknow, facilities for families and gold and pediatrian walknow, are a must.		Submitter does not support the building of high rise apartments as Cleveland already have many that are set! If vacant. Submitter believes that it should be left as parklands.		Submitter does not support a new marina as there is ample area in Rably Bay.		
TH14/480	Submitter is supportive of the proposal.	Submitter comments that the development will be a long term asset to the constituents of Rediand. Submitter comments that the state should be fair, just and balanced in the decision making process but just get on and do it.				Submitter comments that the proposal for transport upgrades are overdue and should be constructed with a priority.							

TH14/481		Admitter is concerned that there has been fraud communities with the communities with the communities with the communities with the communities between the community engagement desires beautiful the communities of the community engagement desires and the community engagement desires and the community communitation process was merely talented; and the process was merely talented to the process was a community of the process was the process was the process was the process which the process was the process with the process was the process which the process was the process whi			Submitter is concerned that there is an detailed and transparent, environmentally impact content and revelopment of the project content and revelopment and accentrated of the project considerable in scheme. Submitter is consented to the development and threatment and impact matters of national environmental significance including the bay, manageness and sarges are and areas of natural flora and flauna.		Submitter is concerned that GI Walter Park and surrounding formation will be lost to private development of the Construction of the lost to private development of the Construction of the Construction of the Construction of the Construction of the paletic interest, before onlying particular does go on page for additional rounds, paging and onlying the Construction of the paletic interest, before onlying paging of the construction of the Constr			Submitter supports the supparaling of the ferry terminal with minimal submitted and surface of the sent consent and surfacely the sent consent and surfacel	Submitter is concerned that the marina development will not bewrite the whole community but only the small minority who have boats.  Submitter does not support the construction of the marina.	
TH14/482	Submitter is supportive of the development.		Submitter comments that it will but a great benefit to Cleveland and the sustainability of Stradbroke sland as a tourist destination.  Submitter suggests that the boundary should be extended South to the northern side of Oyster Point.  Submitter comments that the foreshore is an existing.	Submitter comments that it is a good mix of visit to cater for a wide range of participants.  Submitter does not have an ione with 7.15 storey buildings provided they do not impact on the views of nearby properties.	Submitter comments that the negligible effect on the environment will be minimal.		Submitter comments that the proposal will enhance the facilities of Gi Walker Park.	Submitter is supportive of the proposal and columents that it will bring mule columnical activity to the area and create local imployment.		Submitter sup, orts the pro-usal and comments that will improve the ordinary facilities.	Submitter comments that there is a need for more water based and marina facilities.	
TH14/483			Submitter comments that the proposal is an overdevelopment and will end up looking like the fold coast.  Submitter is concerned that the development will inconsistent with the village atmosphere.	Submitter is concerned about the height limits and notes that it should be only four or fine storays high in keeping with the surrounding area.	Submitter is concerned that there is too much developing in a very tragite area.  Submitter comments that the mangroves should not be removed.	Submitter is concerned that purking infrastructure will not support the increase in demand due to population and couring growth.	Submitter comments that the park shouldings be redeveloped, is a piece of history and ideally located with veiling arous the buy.  Submitter comments to boundwark connecting this ferry and going to be a submitted to be redeveloped by the submitted by eventor-located and printed representations and the submitted by eventor-located and printed representations.  Submitter also support a jetty would be good by this right spot.	Summer's concerned that there will be an increase it traffic jouls, with more returned and residential development.  3. Emitter comments a restaurant and café at the term is all would be good and unat parking should only be short stay.		Submitter supports the modernization of the ferry/water taxi terminal	Submitter comments that the marina should be located away from Parklands.  Submitter comments that the area does not need a marina and only water based development should be opening the channel for the barges and boardwalss connecting Chewland but not encouching on the mangroves and existing parking.	
TH14/484			Submitter comments that there are other areas around Redlands that already act as the gateway to Moreton Bay.				Submitter is concerned that GJ Walter Park will be lost to private Caveopment and the parklands should be left in tact and undisturbed.			Submitter is supportive of upgrading transport facilities	Submitter opposes the marina development but is supportive of boardwalks, cafes and shops that has minimal impact on the environment.	
TH14/485				Submitter is concerned about the building height and believes that it will disturb the extured beauty of the area.	Submitter comments that minimal disturbance to the environment should be the focus of the development.  Submitter is concerned that diveloping for the marina will be constant and oppose the milities constant and oppose the milities constant and oppose the milities.  Submitter comments that management and started dryal face are preparable and the damage that would be done to improvious.  Submitter is concerned about the disturbance to scale help as to	entering clinically is at capality and thire aim no plans to upgrow the road etwork to meet demand.  Submitter comments that a multi level vehicle parking	Sportal comments that minimal impact should be had on golding parts.				solverconnect.  Solventeer is concerned that a marrise will take away from the view and would require regular dradging which would be very experience.	
TH14/486			development will compate with the Cleveland CBD and its viability. Ubenities comments that the primary function of the area must be a hab for bus and ferry transport with some marine industries supported.	Submitter comments that residential development near GJ Walter Park will not be aesthetically pleasing.		locility is important so that paried weblick are a colopenisti dictance from the forey terminal and would minimise the area of land used for vehicle parking. Submitter comments that pedestrian and cycle networks are desirable.	Submitter comments that public access to the bay and water connectively in the GI Walter Park area is important. Submitter comments that the GI Walter Park beach area should be enhanced and trees retained in the area.	Submitter comments that mixed use concepts should be deferred until demand is assessed.	Submitter comments that residential construction should be deferred indefinitely.	Submitter comments that the transit hub is vital.	Submitter suggests that Point Halloran should be the location for the marina.	
TH14/487		Submitter suggests that land should be allocated for the Australia Navy Cadets Training Ship Diamantina within the development.										
TH14/488	Submitter is supportive of the development.		Submitter comments that the area has much potential and needs to be brought forward into the 21st century with new business and outdoor lifestyle attractions.									
TH14/489		Submitter is concerned that the development is an exercise for developers to make a profit.	Submitter comments that more tourism isn't always good and that community will not benefit from the proposal. Submitter is concerned that the development will turn the area into a Gold Coast.  Submitter comments that the development should be kept simple and keep in line with the natural bloudy.		Submitter is concerned that the development will disturb the looks habitats.						Submitter comments that there is no	
TH14/490			Submitter is concerned that extensive commercial development will compete with the Cleveland CBD and its viability.	Submitter comments that the building height chould remain the same and leep it consistent with the rest of Rediands.	Submitter is concerned that the proposal does not follow due process and rules set for environmental protection with regard to removal of manageous and destruction of the marine park.  Submitter is concerned that the development will destroy the natural habitat of marine, plant and wild life in the area.		Submitter comments that there is already sufficient access to the bay and should not be spoiled.	Submitter comments that the additional development is not required and support should be given to local businesses.	Submitter is concerned that the residential precinct is too close to the noise and diesel furnes of the ferries.		demand for more marina borths and the development of another marina would not be viable.  Submitter is concerned about the amount of dredging spoil that would need to be dumped.	
TH14/491			Submitter is concerned that extensive commercial development will compete with the Cleveland CBD and its viability.	Submitter is concerned about the 15 storey height limit and is inconsistent with the area.	Submitter comments that pine trees and mangroves should be retained.  Submitter comments that marine life should be protected.	Submitter is concerned that the current road netowns will not be able to support an increase in population growth. The parking infrastructure should be improved for commuters and disides	Submitter comments that GI Walter Park needs to be retained and improved with amentals.  Submitter is supported of improved water vessel across without extensive dredging and depositing of dredged material into the sea.		Submitter is concerned that the precinct will be high density but have limited recreation facilities.		Lend smooth on Model dated. Submitter comments that improved access for barges, ferries and boating public should be a priority.  Submitter comments that a large marina is not desirable.  Submitter is concerned that the precinct will be a dutch tyldy reclamation of land were marine animals, locals and visitors will only use artificial band and seascane.	

		Submitter comments that improvements arough										
TH14/492	Submitter is concerned about the impact of the development will have on Toondah Harbour environmental, astheticish year of Toondah Harbour environmental, estheticish yand financish; Submitter is concerned that there financial cost of the development will be borne by residents. Submitter is concerned about the scale of development and the cost of the project.	Toondah Harbour where the ferry terminal is and the CSRO site is required. Submitter is concerned that the development is a huge understating and would negatively impact on the community and town of Cleveland. Submitter is concerned that extensive commercial development will compete with the Cleveland CBO and its viability. TH14/576		Submitter comments that the scheme should be withdrawn. Submitter comments that the scheme should consult with a wider range of stakeholders. Submitter is concerned about the fast tracking of the development and the preparation of the scheme.	Submitter believes it is not a vision for growth that has a it is foundation, a necessary understanding on the social, environmental, economic and fiscal impact of its implementation.										
TH:14/577		Submitter requests that the proposed development shows the withdrawn and commence a new community consistency and the commence of the community community consultation grocuss with his base is the foundation the community vision and values as the consultation grocuss with his lab was the foundation the commency fragment fragment foundation that the consultation process. Submitter is commend that the proposed concerned that these documents have not been horsowed by the scheme Submitter is commended that the proposed oriented that the comment of the development scheme is document that does not request only the comments of the development scheme is document that does not comment to the comment of the comment of the comments of the company of the comments of the property comments that the scould comment and comments that the scould comment scheme that the Submitter comments that the scould comment and excounts in the comments of the property assessed.	selling public assets.  Submitter is concered that extensive commercial development will impact on the economic viability of Cleveland CBD	Submitter is concerned about the building height set at 15 storays will impact on the lineability, therep and charinter stage strongene of Coveland. Submitter is concerned that the scheme does not respect the past history of the area.	Submitter is concerned that makine, plant and wall fill on the till just in the lays will be integrated on by the development would that fill and in the bay will be integrated on by the development would plant in an integrated plant in the section of the area. Submitter is concerned that fill scheme does not consider the AMAMS travely appear of the making more of the bay. Submitter is concerned that fill scheme does not consider the above that the impactate.  Submitter is concerned that the high fill an expect as below till in 1,100 year does making that the high is taken to concerned physics soil.		Submitter is concerned that the proposal does not respect the Interiors alignification of ill Water Park is a significant coastal submitter comments that GI Water park is a significant coastal park in Chrostond.			housing. Submitter supports limited	Submitter is concerned that a marina would not be visible due to the extensive trial and ongoing droughing required. Submitter is concerned that there is no demand for marina bettie with many marinas and operating a first opparty was would be a poor investment. Submitter is concerned that the marina would remove the sandy beach in GI WAlber park.		
TH14/579 TH14/580	Submitter comments that the development will facilitate the first steps to delivering new investments and world class developments. Submitter comments that the harbour should be transformed to be exciting destinations with restaurants and activities to attract residents and tourists.	Submitter comments that a location he secured for the ANC T3. Diamentine.											
TH14/581		Submitter comments that the scheme was hastly prepared with Ittle regard to community feedback. Submitter to concerned that the community commission point on smelly tolerance; cather than engaging with the community.	Submitter does not believe that the proposal will create a large increase in jobs except in this short term during elevations in jobs except in the short term during elevations. Submitter is concerned that the scheme destry, the vision of featiment by overdeneloging into the open spaces and destroying trees, bushland and wildfile. Submitter is concerned that elevative commercial development will impact on the economic validity of Cleveland CIDs	Submitter is concerned that the proposal is an overdovelopment including GJ Water Pals and distinsys the exist unique character.  Submitter is concerned that high density development will increase noise, environmental and pobuliton poddems.	Submitter is concerned that an ISS has not been completed to understand the impact to at the development will have on the wild, making and plant fix.	Submitter does not support a new road proposed through of letter Park.  Submitter to concerned that the parking infrastrum and submitter to concerned that the parking infrastrum and of concerned that the parking infrastrum and concerned to the concerned that the parking infrastrum and increase is road out and will lead to congection.	Substitier comments that the first Trees are of historic value and should be retained.  Substitier comments that the area should not be regalated with the comments that the same should not be regalated with the comments that the substitution of the proposal of defect access to the water with a beginn be used for substitutier comments that dovelopments should be retained or already developed lead are not on open spaces.  Substituter composes this improved waiting 6 cycling paths along the foreshore.		Submitter comments that recidential development is should be kept as low rise developments, a storeys maximum. Submitter comments that this precinct should be retained within the Toondah Harboru area and not encreach further north.	Submitter agrees with the ferry terminal redevelopment of commercial development of codes, restaurant and entertainment facilities.  Submitter comments that there should be more competition for ferry services.	Submitter believes that a smaller marina would be more appropriate.		

TH14/582		Submitter comments that there are serious social and environmental considerations which require investigation before the peoporal is implemented submitter commental that Duwlech will reside ungrades to its facilities to keep with the gateway concept.  Submitter is concerned that there is a lack of consultation with the Quandamoda pages.		Submitter is concurred about the 15 storey height limit and the lock of parking infrastructure, access to the foreshore and ferry terminal.	Submitter is concerned about the impact on the ecoology of the matrice part from the development.  Submitter is concerned that the unknown buds consideration of the fundamental environmental issues.	Submitter is concerned that the parking infrastrume and local root interacting will not be able to support the learned in road is set and will find to congection.	Submitter is concurred that the provisions for open space in the proposal in not sufficient to meet the demands and needs of the community and scenario is population.	Submitter is concerned that the precinct is close to a school and a designated bird sanctuary.	Submitter is concerned that building heights are too tall and inconsistent with the history of the area.	will create its own social and environmental issues as will the straighening of the main channel.				
TH14/584	Submitter is supportive of the Toondah Harbour development.			Submitter comments that the building heights set are inconsistent with the area and natural amplitheatre.		Submitter suggests that carpaning facilities should be kept away from the waterfront as far as practicabe.	Submitter comments that retention of as much public space is practical.  Submitter suggests that the waterfornt be a parimary area of public access.			Submitter comments that a study be conducted into the feasibility of two ferry operators being able to remain sustaiable. Submitter supports the provision of vehicular and fast services.	Submitter comments that there is a necessity for engoing dreading works without Toendain Harbour area to ensure access to the harbour at all tide levels. Submitter believes that without sufficient marina infrastructure it is considered that the marina business proposed will be financially univable Submitter comments that unless Fision is			
TH14/585		Submitter comments that the scheme should be re- written and conflined to the existing area occupied by the harbour facility and CSIRO sites.		Submitter is concerned about the building heights and believes that it is not an appropriate area for high density development.		Submitter comments that there is lack of proximity to public transport.  Submitter is concerned that there is a lack of parking infrastructure and local road network to support the erowth in cooulation and tourism.			$\nearrow$		Submitter is concerned that the developmen of the marina will increase traffic issues and destroy the undeveloped coastal areas. Submitter comments that public housing should be included	Submitter comments that the development should encourage good cancerage good canc	Submitter comments that previous developments at the Good Coast or Decklands in Medicuren should be precedent.		
TH14/597			Authority comments that Touch is fortunated the primary port for excess to and from North Stradbries kinds and the proposal food from North Stradbries kinds and the proposal food foreward for promotion and present for food.  Submitter regigests that developments should be commented to the CELD.  Submitter comments that developments that have an amount the harbor under the foreign that the strategies that point function of makes best out out of the water and the food food for the strategies that the submitted food for comments when the submitted food for comments were proposed.	Solumitar is concerned that the unknew does not sufficiently address quality design and construction of buildings.	Submitter comments that the scheme does not adequately provide provisions for the protection of fisal habitats and population.	Submitter comments that connectivity with the enternal road and rain intracels and the CEO should be provided for in the citizens. Sometime also suggests that the enhancement of which and passenger favry facilities at Dunwich should be provided for in the activation.	Substitute comments that if the proposal should provide the style from the style of			Submitter suggests that provisions should be made to include space for vessel berthing, swinging and access but also sufficient landside facilities for the entire operation to function efficiently.			
TH14/599			Submitter is concerned that extensive commercial development will impact on the economic visibility of Covereden CED.  Submitter is concerned that the development will turn into a South Bank development.	Submitter is concerned that the 15 storey height limit is an overdovelapment.	Submitter is concerned that the development will diction on the ecology of the bay and will have detinested impacts on the grallen, but and place tile.	Submystile accordinal that the ligenesse in population and godfur with not to sale by supported by the local rate of retrooks and or blood to obligation.	Submitter in cyclimmed that Toroidan Hardwor will be lost to provable injudicence.  Soliminer does not expect the eschamation or deedings of any area adjacent to 60 Walter Park.			Submitter supports the upgrade to the ferry terminals and the development of the immediate environs of Toodash harabor to include a modest, mixed use urban willage with medium density housing. Submitter supports limited rectamation around the habour to support ferry operations and widening of Fron Channell.	Submitter is concerned that the maintenance and designing of additional waterways for the mains will result in an increased financial based on instiguents.  Submitter is concerned that there is no demand for a marina.		
TH14/600		Submitter is not supportive of the scheme and proposal.				*/							
TH14/601		Submitter is not supportive of the scheme and proposal.			Submitter comments i at the environment must be protected.								
TH14/602		Submitter is not supportive of the scheme and proposal.  Submitter is not supportive of the scheme and					Submitter is not supportive of developing GJ Walter park. Submitter is concerned that the proporal will take away too much public open space and the proposed new areas will not meet the needs and demand of the community.	Submitter believes that there is currently too much retail in the area.					
TH14/603		proposal.				Submitter suggests that provisions are included to extend	Submitter is not supportive of developing GJ Walter Park.						
TH14/605	Submitter is supportive of the proposal.					submitter suggests that provisions are included to extend the rail, road and sea link to Stradbroke Island.							
TH14/606	Submitter is supportive of the proposal		Submitter believes that the development would turn the area into a better Gold Coast holiday			Submitter suggests that provisions are included to extend the rail, road and sea link to Stradbroke Island.	Submitter suggests that sandy spots and shallow areas be filled with sand from Stradbroke Island to create beaches.						
TH14/607	3 To 10 To 1	Submitter is concerned that the two main pictures are not in accord with the tent of the scheme, noting that the pictures are not in accord with the tent of the scheme, noting that the pictures are not 7 storey buildings while the scheme allows for 15 storeys.  Submitter is concerned that the estimated costs of diseignes are not current and underestimated. Submitter is concerned that filmcall liability of directions and maintain the additional waterways will fail on Council and ratepayers.	destination	Salmeter is governed aboy the aight of the height limits and reducition deadlyment.	Submitter's concerned that the provisions for a leads sanctuary is tolerastic and missading to the public.		Submitter is concerned about the loss of GI Walter Park to development and the proposed new road. Submitter is concerned about the loss of GI Walter Park to development and the proposed new road. Submitter is concerned that the new provisions for parkland will not be sufficient to meet the demand and needs of the community.				Submitter comments that dredging and maintaining the waterways for the Marina will be expensive.		
TH14/608			Submitter comments that the development will impact on tourism numbers.	Submitter is concerned that the development will destor the nautral environment of the area.	Submitter opposes the proposal for Toondah Harbour, GJ Walter Park and foreshores as these areas are paramount to the ongoing welfare of marine wildlife and residents.					Submitter comments that a very minor improvement is all that is required for the area.			
TH14/609		Submitter comments that the area was a food producing area, however this will be impacted on by the development. Submitter comments that innovative thinking and planning should be implemented into the proposal.	Submitter comments that Toondah Harbour is not like Redcliffe and should not be copied in terms of the development.		Submitter comments that the wetlands and mangroves areas are essential for fish habitat and wading birds and that the development will impact on their feeding grounds and habitat.		Submitter comments that GJ Waiter Park is essential open space. Submitter is concerned that the loss of the park and the new provisions for parkland will not be sufficient to meet the demand and needs of the community.		Submitter comments that the residential precinct should be located to the railway station with retail to enhance the existing Cleveland CBD.	Submitter comments that the ferry terminal requires refurbishing.	Submitter comments that a marina will not be viable as there are currently other marinas not operating at full capacity		
TH14/612	Submitter is supportive of the proposal in principal.	Submitter is concerned that the community are signing petitions against the proposal without knowing what they are signing.	Submitter comments that Cleveland is far behind Redcliffe and its development. Submitter believes this is required to increase tourism.	Submitter is concerned about the loss of their views due excessive overdevelopment.									
TH14/613				Submitter is concerned that the development will eliminate green space and turn it into a concrete jurgle.			Submitter is concerned that the GJ Walter park and open spaces will be lost to commercial and residential development.
