State code 5: Development in a statecontrolled tunnel environment

Purpose statement

The purpose of this code is to protect **state-controlled transport tunnels** from adverse impacts of development. The purpose of this code is also to protect the safety of people using and living and working near **state-controlled transport tunnels**.

Specifically, this code seeks to ensure:

- development does not create a safety hazard for users of a state-controlled transport tunnel, by increasing the likelihood or frequency of fatality or serious injury;
- 2. development does not compromise the structural integrity of state-controlled transport tunnels;
- development does not compromise the state's ability to construct state-controlled transport tunnels and future state-controlled transport tunnels, or significantly increase the cost to construct state-controlled transport tunnels and future state-controlled transport tunnels;

Using this code

The assessment benchmarks for this code comprise:

- a purpose statement which identifies the overall intent of the code;
- performance outcomes which set benchmarks to achieve the purpose statement of the code;
- acceptable outcomes which identify one way to achieve the relevant performance outcome.

Development complies with the code where:

- it complies with the acceptable outcomes for the performance outcome; or
- it complies with all the performance outcomes, where not complying with the acceptable outcomes; or
- development does not meet relevant performance outcome(s) and SARA determines, on balance, that the development complies with the purpose statement.

This code also includes the glossary of terms for definitions relevant to this code and reference documents which provides direction on how to address this code.

- 4. development does not compromise the state's ability to maintain and operate **state-controlled transport tunnels**, or significantly increase the cost to maintain and operate **state-controlled transport tunnels**;
- 5. the community is protected from significant adverse impacts resulting from environmental emissions generated by **state-controlled transport tunnels**.

Performance outcomes and acceptable outcomes

Table 5.1 Development in a state-controlled tunnel environment

Performance outcomes	Acceptable outcomes
Buildings and structures	
PO1 The location of buildings, structures, infrastructure, services and utilities does not cause damage to a state-controlled transport tunnel, or obstruct state-controlled transport tunnel infrastructure.	AO1.1 Buildings, structures, infrastructure, services and utilities are not located on land identified as a state-controlled transport tunnel. AND
	AO1.2 Buildings, structures, infrastructure, services and utilities can be maintained without requiring access to land identified as a state-controlled transport tunnel.
PO2 Buildings, structures , infrastructure, services and utilities do not interfere with, or result in damage to, infrastructure or services in a state-controlled transport tunnel .	No acceptable outcome is prescribed.

Performance outcomes	Acceptable outcomes
PO3 Buildings, structures, infrastructure, services and utilities do not add or remove loading that will cause damage to a state-controlled transport tunnel or state-controlled tunnel infrastructure.	No acceptable outcome is prescribed.
PO4 Buildings, structures, infrastructure, services and utilities do not cause ground movement or vibration impacts that would cause damage or nuisance to a state-controlled transport tunnel or state-controlled transport tunnel infrastructure.	No acceptable outcome is prescribed.
PO5 Buildings, structures , infrastructure, services and utilities do not cause ground water disturbance on land for a state-controlled transport tunnel .	No acceptable outcome is prescribed.
Filling, excavation and retaining structures	
PO6 Filling, excavation and retaining structures do not interfere with, or result in damage to, infrastructure or services in a state-controlled transport tunnel.	No acceptable outcome is prescribed.
PO7 Filling, excavation, building foundations and retaining structures do not undermine or cause subsidence of land for a state-controlled transport tunnel.	No acceptable outcome is prescribed.
PO8 Excavation, boring, piling or fill compaction during construction of a development does not result in ground movement or vibration impacts that would cause damage or nuisance to a state-controlled transport tunnel.	No acceptable outcome is prescribed.
PO9 Development does not involve blasting.	No acceptable outcome is prescribed.
PO10 Filling and excavation, building foundations and retaining structures do not cause damage to a state-controlled transport tunnel by adding or removing loading.	No acceptable outcome is prescribed.
PO11 Filling and excavation, building foundations and retaining structures do not cause ground water disturbance to a state-controlled transport tunnel corridor.	No acceptable outcome is prescribed.
PO12 Fill material from a development site does not result in contamination of a state-controlled transport tunnel corridor.	AO12.1 Fill material is free of contaminants including acid sulfate content. AND
	AO12.2 Compaction of fill is carried out in accordance with the requirements of AS 1289.0 2000 – Methods of testing soils for engineering purposes.
PO13 Filling and excavation in the vicinity of a state-controlled transport tunnel portal does not cause wind-blown dust nuisance in a state-controlled transport tunnel.	AO13.1 Compaction of fill is carried out in accordance with the requirements of AS 1289.0 2000 – Methods of testing soils for engineering purposes.
	AND AO13.2 Dust suppression measures are used during filling and excavation activities such as wind breaks or barriers and dampening of ground surfaces.

	AO23.2 Windows facing a state-controlled transport tunnel include treatments to block light

Table 5.2 Development impacting on a future state-controlled tunnel environment

Performance outcomes	Acceptable outcomes
PO24 Development does not impede the delivery of a future state-controlled transport tunnel .	AO24.1 Development is not located on land identified as a future state-controlled transport tunnel.
	OR
	AO24.2 Development is sited and designed so that permanent buildings, structures , infrastructure, services or utilities are not located on land identified as a future state-controlled transport tunnel .
	OR all of the following acceptable outcomes apply:
	AO24.3 Structures and infrastructure located on land identified as a future state-controlled transport tunnel are able to be readily relocated or removed without materially affecting the viability or functionality of the development.
	AND
	AO24.4 Development does not involve filling and excavation of, or material changes to, land identified as a future state-controlled transport tunnel.
	AND
	AO24.5 Land is able to be reinstated to the predevelopment condition at the completion of the use.
PO25 Filling and excavation, building foundations and retaining structures do not obstruct, undermine, or cause subsidence of land for a future state-controlled transport tunnel.	No acceptable outcome is prescribed.
PO26 Filling and excavation, building foundations and retaining structures do not cause damage to land for a future state-controlled transport tunnel by adding or removing loading.	No acceptable outcome is prescribed.
PO27 Fill material from a development site does not result in contamination of land for a future state-	AO27.1 Fill material is free of contaminants including acid sulfate content.
controlled transport tunnel.	AND
	AO27.2 Compaction of fill is carried out in accordance with the requirements of AS1289.0 2000 – Methods of testing soils for engineering purposes.
PO28 Development does not result in an actionable nuisance or worsening of stormwater, flooding or drainage impacts on land for a future statecontrolled transport tunnel.	No acceptable outcome is prescribed.

Glossary of Terms

Accommodation activity means any of the following:

1. caretaker's accommodation

State Development Assessment Provisions v3.4

State code 5: Development in a state-controlled transport tunnel environment

- 2. community residence
- 3. dual occupancy
- 4. dwelling house
- 5. dwelling unit
- 6. multiple dwelling
- 7. relocatable home park
- 8. residential care facility
- 9. resort complex
- 10. retirement facility
- 11. rooming accommodation
- 12. short-term accommodation
- 13. tourist park
- 14. a development with a combination of uses 1 to 13.

Actionable nuisance means where stormwater or surface water drainage to a downstream property causes a loss of enjoyment of property or physical damage to property (termed 'nuisance') such that the nuisance is actionable in law.

Note: See the Queensland Urban Drainage Manual, Institute of Public Works Engineering Australasia (Queensland Division), Fourth edition, 2016, for further information.

ADG code see schedule 1 of the Work Health and Safety Act 2011.

Note: **ADG code** means the Australian Code for the Transport of Dangerous goods by Road and Rail approved by the Australian Transport Council, as updated from time to time.

Childcare centre see schedule 24 of the Planning Regulation 2017.

Note: Childcare centre means the premises used for minding or care, but not residence, of children.

DA mapping system means the mapping system containing the Geographic Information System mapping layers kept, prepared or sourced by the state that relate to development assessment and matters of interest to the state in assessing development applications.

Note: The **DA mapping system** is available on the department's website.

Dangerous goods see schedule 1 of the Work Health and Safety Act 2011.

Note: Dangerous goods means:

- 1. asbestos; or
- 2. anything defined under the ADG code as:
 - a. dangerous goods; or
 - b. goods too dangerous to be transported.

Educational establishment see schedule 24 of the Planning Regulation 2017.

Note: **Educational establishment** means premises used for training and instruction designed to impart knowledge and develop skills. **Educational establishment** includes the following uses and activities if they are ancillary:

- 1. on-site student accommodation
- 2. on-site before and after school care
- 3. on site vacation care.

Future state-controlled transport tunnel see schedule 24 of the Planning Regulation 2017.

Note: Future state-controlled transport tunnel means a tunnel that forms part of a future state transport corridor.

Future state transport corridor see schedule 24 of the Planning Regulation 2017.

Note: Future State transport corridor means:

- 1. a future state-controlled road; or
- 2. a future railway corridor; or
- 3. a future busway corridor; or
- a future light rail corridor.

See the **DA mapping system**.

Hospital see schedule 24 of the Planning Regulation 2017.

Note: **Hospital** means the use of premises for:

- 1. the medical or surgical care or treatment of patients, whether or not the care or treatment requires overnight accommodation
- 2. providing accommodation for patients.

State Development Assessment Provisions v3.4

Loading means pressure or force exerted on land or infrastructure.

Outdoor education area means outdoor areas intended for use for the training or teaching of persons. This term does not include playgrounds or outdoor sport and recreational areas.

Outdoor play area see the Queensland Development Code.

Note: **Outdoor play area** means an unenclosed area located outside the external walls of the building. This term only includes playgrounds/play areas in a **childcare centre** or **educational establishment**.

Outdoor spaces for passive recreation means private open space, communal open space or public open space.

Retaining structures means retention **structures** and systems such as walls, batters, anchors, bolts, soil nails, shoring, piles, piers, beams and similar **structures**.

Structure means any built structure as well as retaining structures.

State-controlled transport tunnel see schedule 24 of the Planning Regulation 2017 Note: **State-controlled transport tunnel** means a tunnel that forms part of a state transport corridor. See the **DA mapping system**.

State-controlled transport tunnel portal means the entrance to a tunnel.
